Wood®**

AllweatherWood.com

Allweather Wood is the largest manufacturer and distributor of waterborne preservative treated wood products in the Western U.S.

The company operates **six wood preserving plants** with co-located distribution capabilities and **three dedicated distribution centers**.

These state-of-the-art facilities enable year-round production to meet customer demand.

Each facility features:

- High-speed incisors
- Custom pre-staining capabilities
- Computer controlled treating cylinders
- Distribution capabilities
- Third-party quality control inspection in accordance with American Wood Protection Association (AWPA) industry standards

Pressure-preserved wood is a renewable resource from well-managed forests that requires less energy to produce than many other structural building materials, namely concrete and steel.

Preservative Treatments

Allweather Wood® pressure treats a range of wood species with **American Wood Protection Association (AWPA)** accepted waterborne preservatives formulated to extend the useful life of wood.

Wood species treated:

- Douglas-fir
- Hem fir
- Southern Yellow Pine
- Spruce-Pine-Fir

Preservatives treated:

- Borate
- Copper azole (CA-C / MCA-B, MCA-C)
- Chromated copper arsenate (CCA)
- Fire Retardant
